

PLEXIGLAS® Textured

PLEXIGLAS® Textured

Time Will Leave no Trace – We Promise!

Faded colors are a thing of the past. PLEXIGLAS® does not become brittle or turn yellow. It is the ideal plastic for indoors and out, over decades of use.

Textures and Colors for Every Taste

Classic and modern textures, combined with tried-and-tested or trendy colors, offer many options for all imaginable designs and applications – whether classy or country-style, understated or eye-catching.

Light and Discreet

PLEXIGLAS® with a textured surface protects you from inquisitive glances, but still lets in plenty of light and offers a feeling of space.

Unlimited Creative Freedom

With PLEXIGLAS®, it's the easiest thing in the world to create any chosen shape by drilling, sawing, bonding and routing. PLEXIGLAS® with a textured surface can of course also be cold-curved or durably thermoformed, offering completely new opportunities to obtain surprising effects.

Lightweight and Stable

PLEXIGLAS® weighs less than half as much as glass but is eleven times more break-resistant. Those are major advantages for anyone who needs to transport, install, fabricate or fasten the material.

Safety Is Part of the Deal

Balcony parapets and banisters are subject to stringent tests, e.g. according to TRAV or ETB. PLEXIGLAS® Textured Sheet has passed all the required tests and puts you on the safe side. There is no breakage or sliver formation. PLEXIGLAS® Textured Sheet has even been tested for overhead glazing according to DIN 356.

Non-Smokers to the Fore

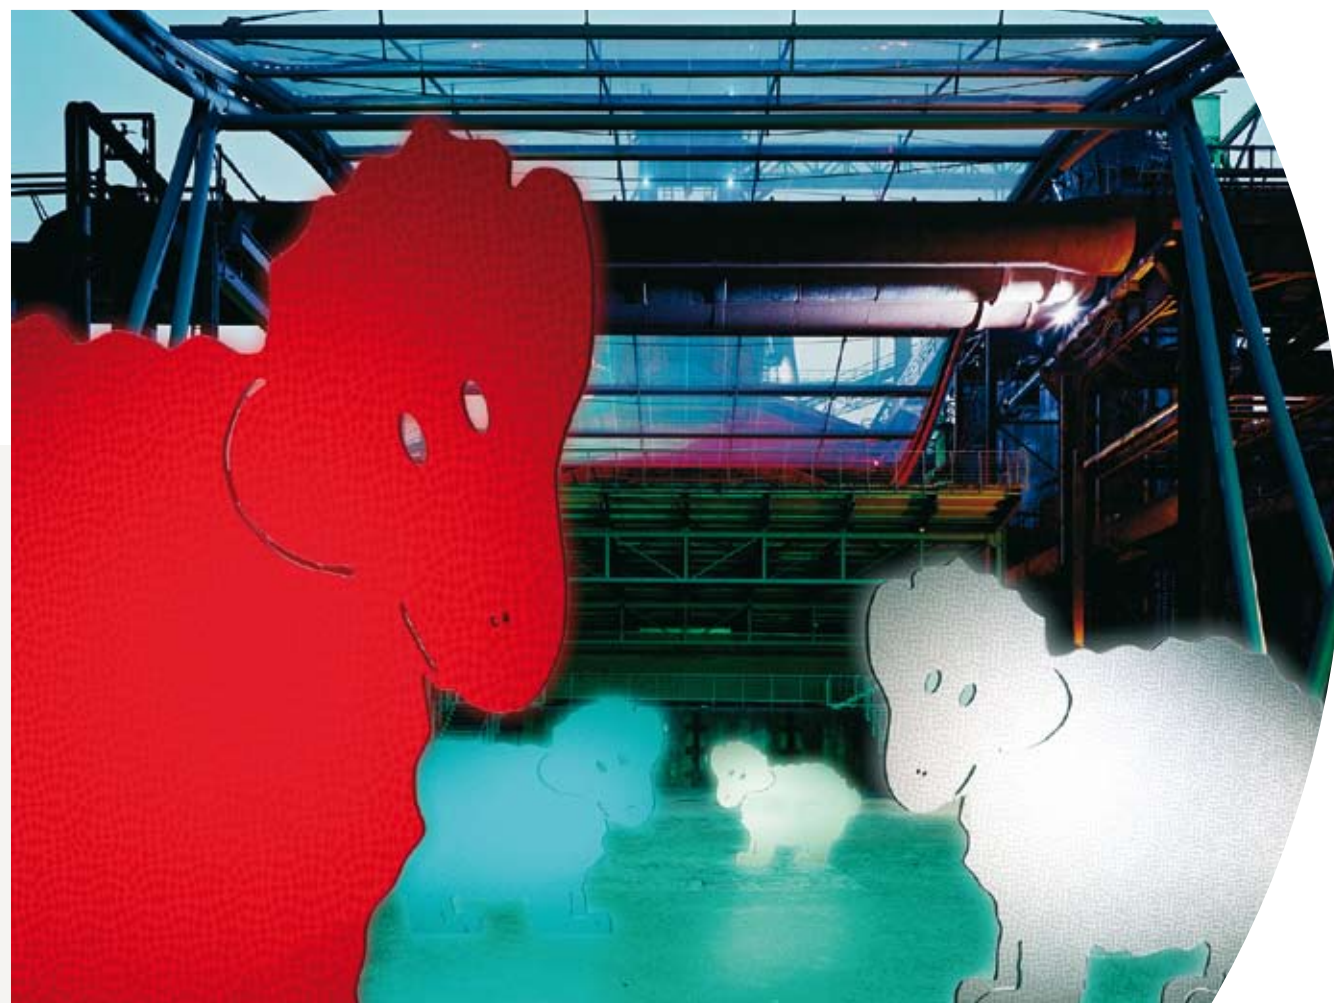

PLEXIGLAS® is unique among plastics because it produces no dangerous smoke and no toxic substances in the event of a fire.

PLEXIGLAS® is classed as unobjectionable and is a B2 material approved for almost all applications.

PLEXIGLAS® Textured

Applications

Ideal for decorative glazing of private, commercial or public structures. Wherever you want:

- balcony parapets
- windscreens
- gate panels
- porches

- partitions
- door glazing
- banisters
